ISG Names Unisys a Leader in its 2025 Provider Lens™ for Cybersecurity Solutions and Services

Company recognized for post-quantum cryptography, AI-powered security and zero-trust capabilities in the US private and public sector markets

BLUE BELL, Pa., Sept. 24, 2025 – [Unisys](#) (NYSE: UIS) has been named a Leader in the 2025 ISG Provider Lens™ Cybersecurity Solutions and Services [Quadrant reports](#), marking the third consecutive year the company has earned this distinction. The reports evaluate service providers that help U.S. enterprises and public sector agencies navigate cybersecurity challenges, while integrating advanced technologies such as artificial intelligence (AI).

“We’re honored to be recognized by ISG as a Leader in cybersecurity for our ongoing commitment to delivering intelligent, adaptive security solutions,” said Manju Naglapur, senior vice president and general manager, Cloud Applications & Infrastructure Solutions at Unisys.

“This recognition reflects our AI-driven and quantum-ready capabilities that empower organizations to shift from a reactive defense position to one of proactive resilience.”

ISG defines Leaders as providers with a comprehensive solutions portfolio, innovative capabilities and a strong market presence that positions them to win business.

Unisys was recognized as a Leader in five U.S. market quadrants:

- **Strategic Security Services for Midmarket:** Unisys delivers continuous threat management, digital identity and access control, and cyber recovery solutions by combining a zero-trust approach with advanced technologies and expert human intelligence.
- **Technical Security Services for Midmarket:** Through its global cybersecurity centers, Unisys provides 24/7 protection using IT infrastructure library-based methods and compliance audits to meet client needs. Its integrated approach includes secure development, workplace controls, maintenance and disaster recovery to deliver scalable, robust security.
- **Next-Gen SOC/MDR Services for Midmarket:** The next-generation security operations center (SOC) and managed detection response (MDR) from Unisys leverage AI, automation, behavioral analytics and zero-trust principles to deliver resilient security operations tailored to hybrid and multicloud environments.
- **Public Sector Strategic Security Services:** Unisys brings to the U.S. public sector a focused strategy that integrates zero-trust architecture, FedRAMP-compliant cloud modernization and leadership in post-quantum cryptography implementation.
- **Public Sector Technical Security Services:** The company combines technical innovation with regulatory compliance to deliver quantum-ready, zero-trust frameworks and customized MDR services that protect critical public infrastructure.

“Unisys demonstrates a strong commitment to integration, operational resilience and readiness for emerging threats, such as quantum computing,” said Gowtham Kumar Sampath, principal analyst at ISG. “The company’s AI-driven solutions, secured-by-design frameworks, and client-centric advisory models position it as a trusted partner in cybersecurity.”
