UNISYS

APPSPACE

Solution brief

Optimize spaces for sustainable outcomes

Sustainable workplace with Appspace®

Highlights

Seamless connection between the physical workplace and digital tools through the Appspace workplace experience platform

ESG compliance reporting to track and prove environmental impact

Smart space planning and intelligent energy controls to cut facility operating costs

Employee communications platform for targeted content delivery across digital touchpoints

Management of building systems, resources, bookings, security and operations intelligence layer for real-time occupancy data and AI capabilities

Easy workspace booking tools, secure access controls and tailored comfort settings

Modern workplaces contain valuable resources you can optimize to work smarter. Every space, system and energy source can help your business operate more efficiently. Connecting building controls and smart monitoring can help you improve operations, communications and space usage in measurable ways.

The Sustainable Workplace solution, powered by Appspace's workplace experience platform, helps you cut inefficiencies. It brings together digital workplace management, clear employee communications, smart space reservations and AI-driven insights. It uses environmental sensors and building controls to track usage, fine-tune settings and help cut waste with minimal manual effort. Facility teams can monitor usage, costs and environmental impact using clear data and easy controls. Employees can easily book spaces and set comfort preferences.

With this focused approach, you can optimize costs, support your staff and meet sustainability goals while reducing the time spent on day-to-day management.

Better spaces. Better business.

Transform underused spaces into thriving workplaces. Save money, support your team and reach sustainability goals all at once.

Beyond basic building management

With Sustainable Workplace and Appspace, you run operations smarter and hit sustainability targets with precision. Smart sensor and automated controls work together to detect usage patterns and adjust building systems in real time. They also give stakeholders the data they need for smarter decisions.

How you benefit

- **Reduced costs:** See exactly how your spaces are used and adjust accordingly. Optimize your real estate footprint while creating adaptable work areas that match your needs and are compatible with conferencing solutions.

- **Improved employee experience:** Give staff control over their workspace comfort with automated lighting, temperature adjustments and air quality settings. Simplify hybrid work with easy-to-use booking tools, secure access controls, easier team collaboration and personalized workplace experiences.

- **Accelerated sustainability:** Meet environmental and ESG targets through automated controls that reduce energy and resource waste. Generate clear compliance reports that demonstrate your progress.

- **Streamlined operations:** Prevent issues before they occur with predictive maintenance alerts. Connect building systems, security controls and productivity tools under one management center and benefit from simple setup and configuration.

- **Enhanced decision-making:** Gain practical insights from workspace analytics showing usage patterns, employee preferences and environmental metrics. Use AI-powered workspace recommendations and conversational AI to plan workplace improvements, auto-generate communications and auto-translate for multilingual workplaces.

Why Unisys?

Organizations need cohesive solutions, not isolated technologies. Unisys combines workplace management expertise with sustainable building systems, giving you a unified view of operations, staff experiences, resource use and space performance.

And this approach has earned accolades. Multiple analyst firms, including ISG and Avasant, have recognized Unisys for achievements in the modern digital workplace. With proven experience in managed services and strong industry partnerships, Unisys empowers organizations to anticipate and solve workplace challenges, creating optimal environments for companies and their employees.

Make every square foot count

Cut costs and reduce waste while creating hybrid spaces employees want to use.
